

Garages, Workshops & Garden Rooms

Welcome to Hanson Steel Buildings

We are proud to introduce you to the most innovative and extensive range of steel buildings in the UK.

Throughout our long established history, Hanson Steel Buildings have built up a reputation synonymous with quality and customer satisfaction.

Our buildings are designed using the latest 3D computer modelling to withstand the forces of wind and snow to European construction standards, and are built using high strength structural steels.

Each of our buildings are delivered and installed by our highly qualified installers, therefore ensuring we can maintain our reputation of offering an excellent product as well as providing a complete service to the customer.

Why Choose Hanson Steel Buildings

CE Marked Product

Our product is CE Marked for the manufacture of steel fabricated sectional structures.

Different Levels of Insulation

Select from a range of insulation levels including the option to upgrade to 40mm, 80mm or 100mm insulation.

Bespoke Designs

All buildings are unique and can be built to your own size and design depending on your exact requirements.

Quick Installation

Our prefabricated panels enable a quick hassle free installation by our highly qualified team of installers.

Wide Range of Colours and Finishes

Your building can be built in any of our 7 standard colours or upgrade to a woodgrain finish.

Maintenance Free Buildings

All our units are maintenance free saving you time and money on the maintenance of your building.

Strong Galvanised Steel Framework

All frames are made of heavy duty, structural grade galvanised steel sections.

10 Year Guarantee

All buildings include a 10 year guarantee giving you peace of mind.

Domestic Garages

Our range of garages are perfect to ensure your vehicles and prized possessions are stored in a secure and dry environment.

We understand that every home is different and can provide our customers with a bespoke design service. We can provide a range of classic or contemporary designs to compliment your property.

All our buildings are made from a maintenance free 90mm heavy duty fully galvanised framework. Our pre-fabricated wall and roof panels allow for easy site access and ensure all installations are completed with minimal disruption.

Our buildings are available in 7 standard colours with an option to upgrade to a wood effect finish. We can also provide a wide range of further options including doors, windows and different panel profiles.

Typical Uses of Your Garage

- Vehicle Storage
- Classic Car Storage
- Vehicle Maintenance
- Workshop
- General Storage
- Fuel Storage

40mm* ROOF & WALL INSULATION	Gold Roof Insulation: 40mm, 80mm, 100mm* Wall Insulation: 40mm, 80mm, 100mm*

"Ordering was easy enough, they came when they said they would come and the finished garage was everything I expected it to be, so no reason to give anything other than 5 stars." John Berwick

Sheds & Workshops

Our range of sheds and workshops offer an attractive solution for the storage of equipment. These buildings also provide a working area that is dry and secure which is perfect for creating the perfect workshop on your property.

All our sheds and workshops are bespoke and can be built in any size to fit your property. All our buildings are of superior quality and attractive in design.

All our buildings are made from a maintenance free 90mm heavy duty fully galvanised framework. Our pre-fabricated wall and roof panels allow for easy site access and ensure all installations are completed with minimal disruption.

Our buildings are available in 7 standard colours with an option to upgrade to a wood effect finish. We can also provide a wide range of further options including doors, windows and different panel profiles.

"I wasn't sure a structure could even be put up in the space I had available, but the person who came to measure it up put me at ease and basically did all the hard work for me in helping determine what the best solution was." Richard Jenkins

Garden Rooms

Our garden rooms are perfect if you work or study from home or have a hobby that requires extra space in a warm and secure environment.

Our buildings are fully insulated and maintenance free and offer a perfect alternative to a timber building. Whatever vision you have for your garden room, we can help you create something completely bespoke to your needs.

All our buildings are made from a maintenance free 90mm heavy duty fully galvanised framework. Our pre-fabricated wall and roof panels allow for easy site access and ensure all installations are completed with minimal disruption.

Planning Permission

For advice on planning and building regulations please visit:

www.planningportal.co.uk

Concrete Bases

Hanson steel buildings fit over the concrete base like a shoebox lid and overhangs the base by 50mm to eliminate water entering the building. For this reason the relationship between the size of the building and the concrete base is very important.

Hanson's will provide you with the correct dimensions for your new concrete base. If you already have an existing base then we can manufacture the building to fit your existing base perfectly.

Accreditations

We have the following accreditations:

Hanson Buildings
